FILTRATION BENEFITS FOR OPERATORS

A few of the ways that water filtration benefits foodservice operations:

Beverage quality

- **Coffee:** better extraction for less bitterness or astringency
- **Espresso:** smooth and rich flavor, perfect cream
- **Iced Tea:** clean taste, no cloudiness
- **Drinking Water:** no chlorine taste or smell, improved safety
- **Fountain Beverage:** better fizz and flavor
- **Ice:** hard, crystal-clear cubes
- **Brewed Tea:** better extraction of flavor, perfect color

Less downtime and longer life for foodservice equipment

- **Coffee Brewers:** reduced scale on heating elements and fewer issues with valves, solenoids and reservoirs
- **Espresso Brewers:** reduced scale on heating elements, reduced stress cracking on boilers, better pressure
- **Fountain Beverage Systems:** better water pressure, improved gas pump efficiency
- **Ice Machines:** reduced scale and downtime due to freeze-up and bridging
- **Steam and Combi Ovens:** less limescale, less corrosion, and better steam consistency
- **Warewashing:** spot-free dishes and glassware, better energy efficiency

Sustainability

- **Energy Savings:** hard water and the resulting scale can reduce energy efficiency in equipment by 50% or more, costing over \$1,000 annually in higher utility bills
- **Water Waste:** high efficiency reverse osmosis from Pentair Everpure can save an operator over 100,000 gallons annually from going to drain as waste water versus conventional RO systems
- **Reduced Waste:** eliminating bottled water in favor of on-site filtered tap water can reduce the 22 billion water bottles going to landfills today
